Telephone/Live Support	Remove trojan horse	Result guarantee
Remove worms, fraudtools, adware etc		

## We keep websites clean

We will install website security solutions, security monitoring scripts to keep your website safe and block unwanted traffic or activities.

## We prevent future attacks

Our support team work 24/7 support to stay online and check the logs of antivirus and security monitoring scripts. When we notice unusual activity on your website, we proactively take actions to protect your website against potential hacking activities.

## We give result guarantee

You get 14 days guarantee. During this period we will monitor and log all activity on your website. If we notice any problem, your website will be cleaned again at no additional charge.

## We fix the bugs which hackers used

We do more than just detect and delete malware from your website. Just to delete the viruses is not enough to keep your website safe. Hackers can exploit bugs or can leave a backdoor to upload malware again. We analyze all files and fix the bugs which the hacker used and prevent any future attacks.
